# Project Management, Controls & Planning Services

## Project Management

Our experienced leadership and wide range of services allow us to meet and exceed client requirements for project deliverables, schedule deadlines and budgets. EnSiteUSA manages all phases of a project, including conceptual planning, design, construction and placement of the facility in service.

*Our project management capabilities include:*

- Project Definition
- Work Scope Development
- Project Execution Planning
- Safety Management
- Scheduling
- Budget Development
- Cost Control
- Quality Management
- Quality Assurance
- Contract Administration
- Construction Management
- Document Control

## Project Control

Project control is an integral part of EnSiteUSA's project management services. Project control functions include budget preparation for the entire scope of a given project, planning for the required versus available resources, and regular reporting of project progress in relation to the project plan. Within the project control area is our quality management function, which assures that all work completed goes through periodic audits and reports to meet SOP specifications for us and our clients.

*Our project control capabilities include:*

- Project Scheduling and Planning
- Budget and Cost Control
- Construction Data Collection
- Construction Progress Tracking
- Project Status Reports
- Resource Planning
- Contract Cost Tracking
- Contractor Schedule Tracking
- Change Orders
- Close Out Documentation

## Planning & Studies

EnSiteUSA offers planning and feasibility studies for every stage of a client's project. Drawing on decades of engineering, design and operating knowledge and experience, we help our clients develop their ideas and identify new opportunities for business.

*Our planning and study capabilities include:*

- Feasibility Studies
- Capital Cost Estimates
- Operational Cost Estimates
- Conceptual Design
- Flow Analysis
- GPS System Inventories
- Facility Audits and Evaluations
- Management Support
- Tariff and Hydraulic Studies
- Permitting Studies

*Our experienced leadership and wide range of services allows us to meet client requirements for project deliverables, schedules and budgets.*

# EnSiteUSA Services

*Immediate and responsive services for transmission, midstream and distribution companies.*

## Quality & Safety

Having successfully worked nearly two million consecutive hours injury free, EnSiteUSA has been recognized by the energy industry and the Governor's Safety Council as being dedicated to providing safe and healthful operations.

## Construction Management & Inspection

EnSiteUSA's construction management and inspection services are provided by EnSite Quality Control (EnSiteQC), an affiliate of EnSiteUSA. All inspection personnel conform to client specific DOT Operator Qualification (OQ) requirements through OSHA, Veriforce, NCCER, MEA and other accredited OQ programs. EnSiteUSA complies with all DOT PHMSA drug and alcohol testing requirements and is a member of ISNetwork.

## Land & Right of Way Services

EnSiteUSA provides professional-quality, value-added land and right of way services to our clients so their facilities are legally located to the satisfaction of all parties. We are engaged in projects across the United States, providing services for all stages of pipeline projects, including feasibility studies, site negotiations and acquisitions, construction support and damage negotiations.

## Procurement & Material Control Services

EnSiteUSA provides a full range of procurement and material control services tailored to the specific needs of our clients.

## Project Management, Controls & Planning Services

EnSiteUSA's project management services include conceptual planning, design, construction and placement of the facility in service.

Our project control functions include budget preparation for the entire scope of a given project, planning for the required versus available resources, and regular reporting of project progress in relation to the project plan.

We also offer planning and feasibility studies for every stage of a project.

## Engineering & Design / Drafting Services

We maintain our commitment to sound, professional engineering services through compliance with all applicable regulations, industry standards and codes. Our accurate, complete and thorough design and drafting services minimize construction errors and cost overruns to benefit a project's bottom line.

## Survey & GIS Services

Using our staff of registered professional land surveyors (RPLS) and technical specialists, along with the latest GPS technology, EnSiteUSA offers a complete array of innovative, cost-effective surveying solutions across the U.S. Our extensive experience with the development, maintenance and expansion of geographic information systems (GIS) sets us apart from our competitors.

## System Operations & Maintenance Services

EnSiteUSA provides system operations assistance and maintenance services from start up through contract operations.

*EnSiteUSA provides a full suite of pipeline management services, from conceptual planning to start-up and operations.*
